What is the best face morphing app. Good face morphing apps.

Photo morphing is a fun trick that is made possible with the development of image editing applications. It is a technique that allows you to transition a figure or face into another picture. You can create gifs, videos, and even memes using these photo morph apps. It is commonly used to make before/after pictures and videos that showcase significant changes between them in order to compare the differences. Photo morphing is fun and easy to do with the right apps. And the best part is that anyone can morph a photo very easily. However, you need to choose the right photo morph apps. Also read: Best Photo Editor Apps for Android There are a number of face morph apps available on the market for Android and iOS today. Given below is our list of the best apps amongst them. Best photo morph apps for Android and iOS 1. Face Morph Available for free on Google Play, the Face Morph app is easily one of the best when it comes to photo morphing. This app allows you to transition between multiple faces smoothly. It is very easy and efficient to use and does the transition pretty quickly. This app allows you to edit your face and add features according to your preferences. You can also adjust the facial features, which allows you to create vastly morphed images. Along with creating images, you can also use the photos to morph videos or gifs. However, the Face Morph app has ads within it and puts its watermark on the exported images. If you are okay with that, then it is one of the best photo morph apps. Download: Android 2. Pie Morph Pie Morph is another app that lets you make funny morphed images. It is freely available for Android on Google Play Store. This app can recognize faces within a picture and allows you to edit and morph them using different filters. It also features various filters and base animation that one can morph their photo into. It allows you to create animations such as adult to child transformation, human to animal transformation, etc. It is easily one of the best face morph apps. However, the app does have a lot of advertisements within it. Download: Android, iOS 3. Face Swap Face Swap app is another good option in the photo morphing apps category. Like the others on this list, Face Swap allows you to create beautiful and seamless morphing animations in various categories, such as animal morphing or horror morphing. You can also edit certain features, such as the position and blending. It is an easy option for you if you are looking for a photo morph app. Download: Android 4. Zooface The Zooface app allows you to swap and morph your face into any animal image available on the app. This app features a vast amount of pet and animal pictures that you can choose from. You can easily customize and edit photos to your preference. Upon completion, you can save the images as gifs or videos and export them to your camera or directly share from the app. This app also has a lot of amazing tools that you can use to create various effects. You can choose from a number of filters that can be added once you have completed the photo morphing. Download: Android 5. Animal Face The Animal Face app has the prime intention of morphing human faces into animal faces. It has many animals faces that you could choose to morph a picture into, including lions, tigers, cats, dogs, wolves, etc. But, the conversion process is automatic; hence, you cannot edit in between transitions. The Animal Face morphing app is one of the best at what it does, adding animal faces to images. If you want an app that morphs your images into animal faces, then this app is perfect for you. Download: Android 6. Morphy Like the previous apps, this app provides an excellent platform to create and design your morphing or transformation videos. Morphy specializes in video and GIF morphing. It can create transition videos between a human and an animal, a human and a celebrity, or even plain time-lapse videos. It features a lot of editing and blending options that you can effectively make use of. However, a drawback of Morphy is that the app is only available on the iOS App Store. It is not available or downloadable for Android devices. Download: iOS 7. Reface Reface is an app that can create memes and videos using your photo. It features many filters and images of animals, celebrities, and memes that you can swap your face into. This app is a perfect option if you are interested in creating face morphing videos and are looking for face and photo morph apps. Reface app also has a premium subscription that comes with additional tools and features. Boasting thousands of 4+ ratings and hundreds of satisfied user reviews, Reface app is free to download from Play Store and App Store. Download: Android, iOS 8. Beauty Face Plus Beauty Face Plus is another app that can morph images and videos. Using an identifiable photo, you can morph your image into pretty much any animal or bird you want, such as tigers, cats, dogs, etc. It also allows you to morph certain regions of the face, such as the eyes, while retaining the rest of the original picture. This technique can be used to give yourself a pair of cat's eyes on your very own face! It also features many filters, frames, and emojis, which you can use to edit your images. Beauty Face Plus has high ratings and reviews on Google Play Store. Hence, it is trusted by many people, so you can try it if you are in search of face morph apps. Download: Android 9. FaceApp FaceApp allows you to morph images, along with beauty and makeover editing. You can also transition from old to young and grow a beard in your pictures. It is also possible to swap and morph your face into any of the hundreds of animal or celebrity faces available in the app. Boasting 100million+ downloads on Play Store, this is a heavily highly rated face morph app. It has many 5 star ratings and reviews, making it one of the best photo morph apps on this list. Also, currently, it is in the 3rd position in the top-grossing list of apps in the photography category on the Play Store. Download: Android, iOS Well, this is pretty much it. The list can go on forever. However, these are the top picks you must try if you are looking for photo morph apps. Photo morphing is fun within itself. There are no limitations to what you can try with these apps. From being an animal to other genders, looking at your future self, to predicting your future child's look, there are many fun elements that these face and photo morph apps bring. Also read: Best Video Editor Apps for Android Keep on trying these apps, and comment on your favorite ones. Also, do mention any other apps you think should be on the list or are your personal favorites. We went through that long, unamusing period in social media where people mainly just posted boring selfies. Thankfully, that is pretty much over, and a new era of face swapping has taken its place. Hilarity has ensued. However, it's not enough to slap one's face on a different body—many apps can do that. The best face swapping Android apps morph faces into a somewhat convincing hybrid—allowing for blending—and they do it quickly. We have amassed a collection of these apps right here. So get ready to be able to insert your face into that meme, swap grandma's face with baby's, and make fun of your pets and celebrities (neither are likely to know about it). These are the face swapping apps to download for endless and effortless entertainment. Must Read: Best 9 Fun Apps for Android to Lol All Day 1. Face Swap I must admit, I was a little turned off initially when I saw that the creator of the app was Weather Radar Forecast (Face swapping and weather forecasting seem a little unrelated), but after using it I was pleasantly surprised. The app has a little something for everyone: whether you are going for cutesy, funny, or maybe even horrifying. It offers real-time swapping, motion stickers, filters, themes, and retouch functionality. When you are done, compose your faces into a collage, or pick out a different background. With an average rating of 4.4 stars and up to an estimated 50 million downloads, users are mostly happy and engaged. Download: Face Swap 2. Face Swap Booth – Face Changer With one of the largest repositories of faces, Face Swap Booth also allows you to manually add more of your own using the app's automatic face detection feature. And considering that some competitors' apps have mistaken chocolate chip cookies for a face, a competent auto detect feature is nice to have. The app also allows you to select only certain facial features to swap and overlay. So you can create a face using your eyes, a celebrity's nose, a friend's beard...your imagination is the only limit. Swap faces from different photos, blend faces together, and save your creations to use again later: Face Swap Booth comes pre-loaded with lots of celebrity faces. You can also overlay any object into your photo. Even though this app may not have the most reviews or downloads, it's still one of the best—even compared to some of the more popular apps. For instance, we chose this app over the more widely known Face Swap app by Axhunter, because of better functionality, options, and fewer ads. Download: Face Swap Booth – Face Changer 3. Face Swap Microsoft just recently jumped on board with its own face-swapping app, but better late than never. Microsoft differentiated its app to stand out from others that have been in the game longer by adding some unique features and abilities. This face-swapping app allows you to extract a face from one image to superimpose onto images from the web (with a search option provided by Bing) or from your own gallery. Additionally, the app sports some pretty awesome facial recognition technology. So if you want to plaster your face onto the body of a bodybuilder you find online, you can. If you've always wanted to travel to France, but can't afford to, you can at least make it look like you are standing by the Eiffel Tower. You can also use Face Swap to try out new hairstyles and outfits. There are no ads, but some users have complained that the number of notifications is excessive. Download: Face Swap 4. Face Swap – Photo Face Swap As long as the photos you are working with are halfway decent, this app is pretty easy to use because of its very simple user interface. This Face Swap app also comes with a few different special effects, such as the Face Bomb, which puts the same face on everyone in the photo. It also affords the ability to swap multiple faces, save, and share to social media. Especially for a free app, Face Swap – Photo Face Swap works well and remains to the point. This, despite less than optimal handling of pictures with low lighting, keeps the app in the category of best Android faceswapper apps. Download: Face Swap – Photo Face Swap 5. MSQRD Facebook's own face swapping app can transform the people in your photos into zombies, animals, witches, clowns, and more. If you've seen pictures of your friends with big doe eyes, floppy puppy dog ears, or a bushy fox tail, you've probably already seen the results of what MSQRD can do. It's free, but it's not exactly a small app at 32 MB. The trade-off for that large size is that you can add filters in real time. Many of MSQRD's effects are animated, and can even be applied to videos. The features are similar to Snapchat's filters and lenses. You can save your creations for later, or even broadcast them live. The MSQRD app can be used independently of the Facebook app, and can even be used offline. Download: MSQRD 6. Face Swap Live Many would say that this app is the best, hands down. And it has many of the appeals we've mentioned in certain apps thus far. Swap faces and body parts in real time. Search for celebrity pictures from the web to trade parts with. It's easy to use. But the app comes at a price, and we aren't just talking storage space, but an actual dollar (or so). Still, sometimes the best things in life aren't actually free, but you might want to figure out what features are most important to you before you purchase. For 99 cents, this app hits all of the high notes. Download: Face Swap Live 7. Lip Swap Familiarity breeds contempt (or just gets boring), and when you've done the face swapping thing what seems like a thousand times, you're going to be ready for a variation. Enter Lip Swap. The Lip Swap app gets specific and lets you trade out lips, eyes, etc. It also has video capability. Download: Lip Swap 8. Animal Faces - Face Morphing Become one with your spirit animal. Choose from over 50 different kinds of animals. It's free, capable of multiple effects, and can save and share your work. You can even add your own pets. Download: Animal Faces - Face Morphing 9. MixBooth MixBooth gets its name from its ability to mix two faces into one, and it does this for free. The app does request your assistance in placing markers over the mouth, eyes, and chin. Ever wondered what the love child of you and a friend would look like? Now you can find out. While not a face swapper app per se, it is one of the best face morphing apps on Android. Download: MixBooth 10. Photo Face Swap – Face Camera Take makeovers to another level with Photo Face Swap. Trade up to six faces between two photos. You can easily waste a lot of time experimenting with various stickers. Choose from in-app animals, movie themes, occupations, cartoons, famous characters, or use your own. Download: Photo Face Swap – Face Camera Conclusion To be honest, I've often found face-swapped photos to be kind of weird. But sometimes weird can be wonderful. And it's cheap entertainment. Give your photos some pizzazz. Let us know what you think of these apps. Do you have other favorites? Share with us in the comments. Featured Image Credit
